

CPSC 411 - Assignment 02 - BMI Calculator

Create an iPhone application that calculates BMI allowing the user to enter a height and weight to calculate the subject's body mass index resulting in not only a score and category but a visual representation of their results such as a picture.

Be creative with the UI and how you communicate with the user. Feel free to experiment with sound, animation, images, etc. to give your app a distinct look.

Catgory	BMI range (kg / m ²)
Severe Thinness	< 16.00
